

1. Go to <http://www.mirc.com/get.html> to download the current version of mirc.
2. Install the client.
3. Go to Menu, File-> Select server and click "Connect" (if you started up your mIRC for the first time after installation, this dialog should come up automatically)
4. Add your information with your nickname matching the one assigned to you

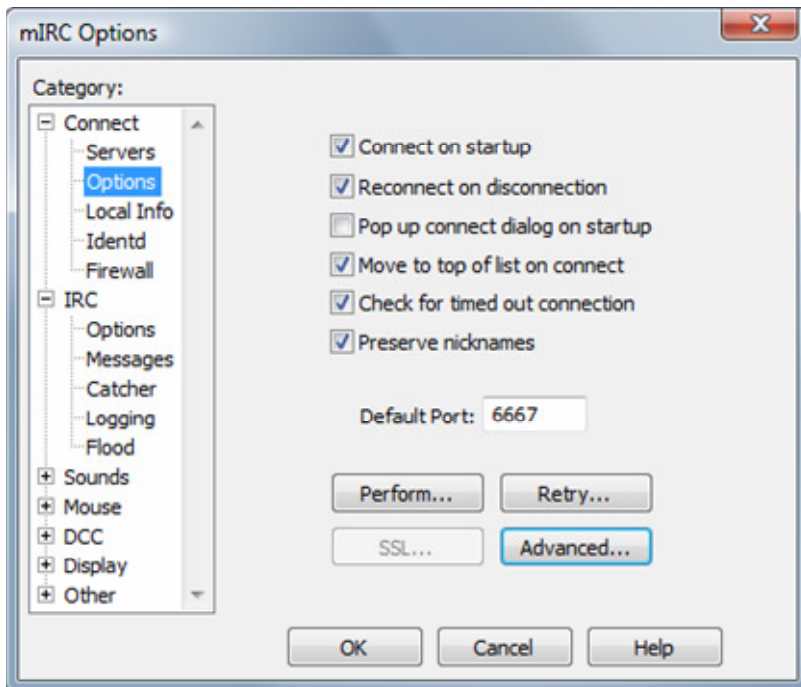

5. Go to Menu, File-> Select server, click "Servers" and click Add button.

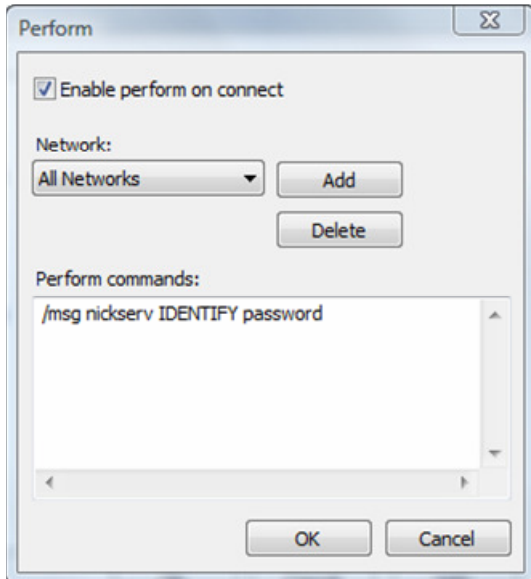

6. Add Realitytrader as Description, irc.jastech.de as the IRC server and 6667 as Ports.

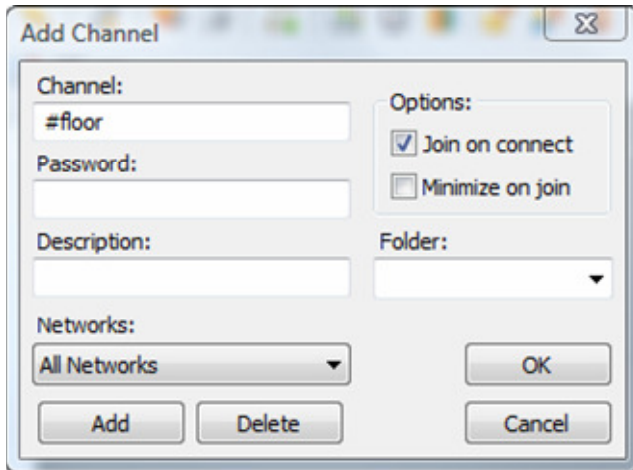

7. Go to Menu, Tools-> Options and check the checkboxes as shown.

8. Click the perform button and add the following command with your own password :
9. `/msg nickserv IDENTIFY <password>`
10. Make sure the "Enable perform on connect" is checked.

11. Go to Menu Favorites -> Add to favourites

12. Add the #floor and #discussions channel and check "join on connect"
13. Press OK and your mIRC should automatically login to the chat room next time.
